## Skill

---

JavaScript, React, Tailwindcss, Nodejs, MongoDB, Website Building, C, C++, GitHub, Problem-Solving, Communication Skill, Leadership Skills

## CERTIFICATION

---

- : *Frontend Development : IBM SkillBuild*
- FullStack Webdevelopment : *IBM SkillsBuild*
- : *Java : Coursera(Udemy)*

## Education

---

**Elite Institute Of Science and Application, Cuttack** *sept 2020 - july 2022*  
*+2 in science*

- Mark: 493 (82.17)

**Biju Patnaik University of Technology Rourkela** *sept 2022 - july 2026*  
*BTech in Electronic and Communication Engineering(ECE)*

- GPA: 8.6/10.0

## Projects

---

### Real-Time-Chat Web

developed a real-time-chat-web enables real-time communication through advanced features like WebSockets, AI-powered responses, and user presence tracking, making interactions seamless and engaging. It works by establishing persistent connections between clients and servers, ensuring instant data exchange, and is useful for customer support, collaboration tools, and interactive platforms.

- Tools Used: HTML, Tailwind CSS, React, Nodejs, MongoDB

### Ticket Booking Web Platform

Ticket Booking Web Platform is developed for Allow users to search for events, movies, or travel schedules and view details like dates, locations, and prices. Enable seat selection, booking confirmation, and secure online payments. Provide user accounts to track bookings, receive notifications, and access booking history. Offer admin controls to manage events, availability, pricing, and generate reports. Send email or SMS confirmations and reminders to users for booked tickets.

- Tools Used: XML, React, Nodejs, MongoDB

### AI car Marketplace

- This API-based Car Marketplace project offers advanced features like AI-powered car search that recommends vehicles based on user preferences and budget. It provides real-time price comparisons, detailed specifications, and available test drive scheduling. Users can easily explore, compare, and choose cars with personalized suggestions, making the buying experience smarter and more convenient.
- Tools Used: Reactjs, Tailwind CSS, Nodejs, SHADCN UI

## Experience

---

### Webdeveloper Intern

*IBM Skill Build*

- building an Online Food Delivery Website using the MERN stack (MongoDB, Express.js, React, Node.js) in an IBM internship program, I work on designing and implementing both front-end and back-end systems. I create interactive user interfaces with React for browsing menus, placing orders, and tracking deliveries

in real-time. On the server-side, I use Node.js and Express.js to handle API requests, authentication, and payment processing. MongoDB is used to store user data, restaurant details, and order history securely. The platform ensures smooth performance, scalability, and a seamless ordering experience for users.

## Technologies

---

**Languages:** JavaScript,c,C++,Java,

**Technologies:** Reactjs,Nodejs,MsOffice,Website Buildin,
